should try and restore to a
previous backup or wait until
the latest bootloader and the

next CM update is released.

Q: Git rebase works only on master I am trying to rebase my working branch to master, but I always get this message: fatal: The current branch lst-back-bundle is merged. I find this issue a bit weird, because master is already merged with other branches (I pulled the

latest release from master for testing). Here is the output of
git branch -r -v: * master
