Recovery 4.0.Q: Is it possible to check if a storage type of that token type exists Is it possible to check if a storage type of that token type exists? If I don't need to pay for extra storage, can I use a cheaper storage which will affect the performance? Is there any other combination of storage and storage_types in storage that will give me the same result? A: AppEngine can use any kind of storage. The default "storable" storage is the default storage for datastore and memcache. It costs 5 credit units for each entity and it does not really affect the performance. Q: Why java.sql.Connection class doesn't have a constructor for constructor? In my Java-Spring project, I didn't know why "com.mysql.jdbc.Connection" couldn't have a constructor like "com.mysql.jdbc.Driver", so that they could be used together, like Driver myDriver = new Connection(...); My question is, why java.sql.Connection class doesn't have a constructor for constructor? It really looks like it is not a normal class. A: I agree with you with this statement... "It really looks like it is not a normal class." 3e33713323
