*Gameplay and Controls Controls: WASD or Arrow Keys to move Mousewheel to steer M to use a camera or pick up a coin Your goal is to reach the specified cash amount. You do this by driving through checkpoints and avoiding being stopped by the police. Every time you are stopped by the police the cash you earn will be subtracted from the

amount you need to reach. As you reach checkpoints, the number will go up and as you miss checkpoints, the number will go down. 1) The vehicle you are using will have its own special stats: Time it takes to stop the police Maximum amount of cash you can earn per coin Average amount of cash you earn per coin Minimum amount of cash you must have to complete the level Once you have reached the amount of cash you need to reach to move on, you will be able to gain access to a more advanced vehicle. 2) You can switch between vehicles to keep your vehicle in view and avoid the police The 'SAT CAM' pickup will always be in the city and will show the view from the eye of the SatCam. When you are driving, click the mousewheel button to switch between 'NaviCam' and 'SAT CAM', giving you full views of both cameras. *Camera / Tracking System NaviCam is designed to work regardless of what camera you have selected. While in 'Sat Cam', the camera is stationary and will only show the view of the SatCam, but still work normally. *Vehicle Physics: Vehicle physics includes the ability to tilt and steer your vehicle. It should be noted that moving too fast will cause a very bumpy ride. *Vehicle stats: Time it takes to stop the police Maximum amount of cash you can earn per coin Average amount of cash you earn per coin Minimum amount of cash you must have to complete the level Once you have reached the amount of cash you need to reach to move on, you will be able to gain access to a more advanced vehicle. 3) The amount of cash you need to reach the checkpoint will be different for each vehicle. Vehicles will have their own level of difficulty and the amount of cash you need to reach will be shown on the bottom left hand side of the screen. 4) The amount of cash you need to reach will be shown for each vehicle. You will need a good understanding of your vehicle to d41b202975

What's new in Drive Switch Evade:

”. While this individual would be ruined immediately, the next generation will likely come with upgrades that actually do a lot of the complex work. Perhaps their assault rifles will start to look like "Broadsword Launcher", "Smith & Wesson Standard Pump 30" or maybe a "Siege-Class Heavy Tank". The problem with the "Counter-Switch Shield" evasion move is that it does not work at all for other classes with a shield. So while defending a "Barthoul" assault rifle and uppercutting them with "Burning Oath", "Washout" or "Meat Wagon" is great fun, meleeing a "Churchie" with a shield is actually not something I ever want to do. Why? I actually like playing the "Barthoul" because I find it more fun than playing the melee-based "Churchie". Sure, the "Churchie" has more community support and more people like them in-game, but let's face it, the melee-based "Barthouls" are fun to play because the game designers did a good job balancing skillsets. And that is the problem with the new system. Yes, it adds more fun with people trying to evade and it's great to see people coming up with creative ways to do this, but it also adds a new player class ability with a new "Evade" skill. Since that hurts player balance, I have to say I am not a fan of this approach. There are things you could do to avoid playing the "Evade" class such as changing your weapon load-outs or swapping someone out. But what if I load up a "Barthoul" armor set that I know has good stats for the DPS I am using, then change it up so I can evade more often? Do you then throw a "Evade" into the mix? You would be making good use of your damage, but at the cost of balance. The point is it adds complexity on top of already complex things in this game. The biggest problem here is that it is not clear whether the new system is a temporary buff or a planned feature. So we will likely have some resources to test out, play a bunch of it to see how it runs, and then do some
