For the purpose of application development, AutoCAD supports the Common Language Runtime (CLR) and Open Architecture Framework (OAF) as runtime platforms. The 2008 release of AutoCAD introduced the "Smart Technology" provided by a new API that enables the user to programmatically modify drawing objects, setting draw states, other drawing settings or

even drawing views. AutoCAD software is sold as stand-alone software, as part of AutoCAD LT, or as part of the Autodesk Premium Master Collection.

AutoCAD 2007-2017 Multi-model visualization

AutoCAD has a feature called Multi-model visualization, which is the ability to display data from more than one model at the same time in one window. For example, a first drawing may include an entity from drawing A and another entity from drawing B. In this case, all of the entities from drawing A will be displayed as blue wireframe boxes and the entities from drawing B will be displayed as grey boxes. When a drawing is open, users can click on an entity to change its drawing. Extensions Third-party vendors of CAD software often offer third-party extensions, which allow users to extend AutoCAD functionality in various ways. Some extensions require a monthly or yearly fee, others are free. Add-ons for AutoCAD AutoCAD contains several products that are offered as add-ons or extensions: AutoCAD Architecture is a third-party product for architectural design, constructed from several AutoCAD extensions

by Autodesk. AutoCAD Civil 3D is a third-party product for construction design, which was the first add-on for AutoCAD. Civil 3D contains several extensions that provide basic functionality for civil engineering projects. AutoCAD Electrical is a third-party product for electrical design, which contains several extensions that extend the capabilities of electrical design in AutoCAD. AutoCAD Electrical LT is a third-party product for electrical design, a combination of AutoCAD LT and AutoCAD Electrical. AutoCAD Civil 3D LT is a third-party product for civil engineering projects, a combination of AutoCAD Civil 3D and AutoCAD LT. AutoCAD 360, formerly known as 360 Degrees, is a third-party product for virtual reality (VR) and augmented reality (AR) visualization, created from several AutoCAD extensions by Autodesk. 1. Technical Field The present invention relates to a liquid ejecting apparatus, a head unit, and a method of manufacturing a head unit. 2. Related Art A liquid ejecting apparatus has been known as an example of a liquid ejecting apparatus. A printer is known as an example of the liquid ejecting apparatus. The printer performs printing by ejecting a liquid from a nozzle of a head onto a recording medium. The liquid ejecting apparatus may eject a liquid from each nozzle. The liquid ejecting apparatus may include a carriage, a head mounted on the carriage, and a tank which stores the liquid. The carriage may move along a carriage moving direction to eject the liquid from the nozzle onto the recording medium. The liquid ejecting apparatus may adjust the amount of liquid to be ejected from each nozzle according to the condition of the recording medium. The liquid ejecting apparatus may eject the liquid from a plurality of nozzles onto the recording medium at the same time.

The liquid ejecting apparatus may eject the liquid from the nozzle onto the recording medium in a state in which the head is inclined with respect to a reference direction.
